

Amendment to the Specification

Please replace the paragraph [0053] on page 10 with the following:

[0053] The method according to its primary aspect can be extended to further comprising the steps of dispatching said LA instruction in the same cycle as the extract instruction. Then, in the same cycle both of said two instructions write the results into the RS, causing a multiple write into the same result register..

Please replace the paragraph [0057] on page 10 with the following:

[0057] Further, when associating the same instruction execution unit to said first and said second instruction a multiple write into the same result register is prevented which could be otherwise be caused by a concurrently performed execution of said first and said second instruction.
